

Sleeve

Line:

Comprecycl

Elastomer coated sleeves with different hardness to be used with double-sided tape 0.1 mm thick.

Cylindrical core made of epoxy-based fiberglass.

Main Properties

- Good resistance to aggressive solvents.
- Smooth mounting and good fixation on the mandrel.
- Suitable for high speed Printing.
- High resilience.
- Ozone resistant.
- Antistatic properties.

Córdoba, Argentina

Technical specifications

- Tolerance:
TIR $\leq 0.03\text{mm}$
(Mounted on a mandrel with a $\leq 0.005\text{ mm TIR}$)
- Hardness: High, medium and low.
- Working pressure and flow rate:
6 - 8 bar and 12 litros/seg.
- Working temperature:
16°C - 45°C
